

NO FEAR

(Neil Murray/Freddie Tallis)

We met in school it was '75
Straight away we could feel
The vibes of friendship
As time went on the knowledge we shared
Made us strong, oh yeah
You used to say late at night
I have no fear, everything's alright
We have no fear, everything is clear
We were together

You went alone to a party one night without me
A man came down wanting to fight
He went away and you followed behind
Just to make the peace
'Cause that's the way you were
But something mad was loose in the dark
For when you knocked on the door
You copped a shotgun blast
And I watched it all on the TV news
And never knew
It was you till the papers arrived next morning

Who can explain what's going on?
One minute you're alive, the next you're gone

Who can explain what's going on?
One minute you're alive, the next you're gone

I lost a friend at such a cost
But I keep on movin' gotta carry on
Just to make the peace with the past
And the memory that dies hard when you said
I have no fear everything is clear
When you're near me

I know you've all lost someone you love
But you're gonna keep on movin', struggle on
Till the time comes with somebody new
Who truly understands

And you can say, you can say
We have no fear everything is clear
We have no fear everything is clear
We have no fear everything is clear
We have no fear everything is clear
We have no fear everything is clear
(We are together)

We have no fear everything is clear
We have no fear everything is clear
(We are together)

We have no fear everything is clear
(We are together)

We have no fear everything is clear
(We are together)

We have no fear everything is clear
(We are together)

We have no fear everything is clear
