

SILVER CITY

(Neil Murray)

I've been out on the one tree plain I've been down below in a Nullarbor cave
I've seen the bush I've seen the towns and I still don't know where to settle down
When I woke up in the dry Todd river I'd done a little damage to my liver

I gotta move to the silver city
I'm coming last but I'm coming steady

A lot of people that I used to know they all rushed off down a narrow road
Sold themselves for a dream home true they made their money but they're still
blue

Take a look at the life you lead you win so much but we all still bleed
I'm sitting here under a wide blue sky and I just get bothered by dust and flies

I gotta move to the silver city
I'm coming last but I'm coming steady
I've had enough I know what's better pick a ride on a rollin' winner
When I get to the silver city

Sick of living like ad dog I say I'll sign that pledge I wanna leave today
I'm gonna see how the other half lives show me what they do to deserve all this
I'm coming with you when you do your shopping
I wanna be there to taste the topping
I want the trimmings I want the lot
A house and a car and a great big yacht will do

I gotta move to the silver city
I'm coming last but I'm coming steady
I've had enough I know what's better pick a ride on a rollin' winner
Put my feet up in the silver city

Fast living, pretty women, lotta money, you'll be winning
When ya get to the silver city
(I hope you're happy there)
I'm gonna see ya in the silver city
(I hope you're happy there)
I wanna meet ya in the silver city
I've had enough I know what's better pick a ride on a rollin' winner
When I get
